

World-Class Communications Anywhere in the World™

# Disaster Recovery Communications

DR-250 DR-550 DR-1000 DR-1500 DR-2000

Proper preparation for severe storms, natural disasters, or even localized telecommunications disruptions is essential for personnel leading recovery efforts and for organizations with little tolerance for downtime. Whether supporting communications for remote sites, critical operations centers, temporary command posts or emergency response vehicles, pre-planning must include a communications system for the days or even weeks it may take to restore local utilities.

CapRock has created a pre-packaged disaster recovery communications solution designed to be quickly deployed and ruggedized for use in the post-disaster environment. The DR series packages are complete mobile communication solutions, providing true broadband Internet and voice service when traditional means are unavailable.

## EQUIPMENT PACKAGE\*

- > 1 trailer-mounted fixed antenna
- > 1 IP telephone included with each phone line
- > 1 fax machine included with each fax line
- > 1 handheld satellite phone (usage minutes extra)

## SERVICE DETAILS\*

- > Service charges apply only when system is activated

## TO RESERVE YOUR PACKAGE

- > Call **1-888-482-0289** today to reserve your equipment and service

\*Specifications and availability of options may vary by program type

## Two programs for disaster recovery preparation

### BROADBAND DR-VSAT™

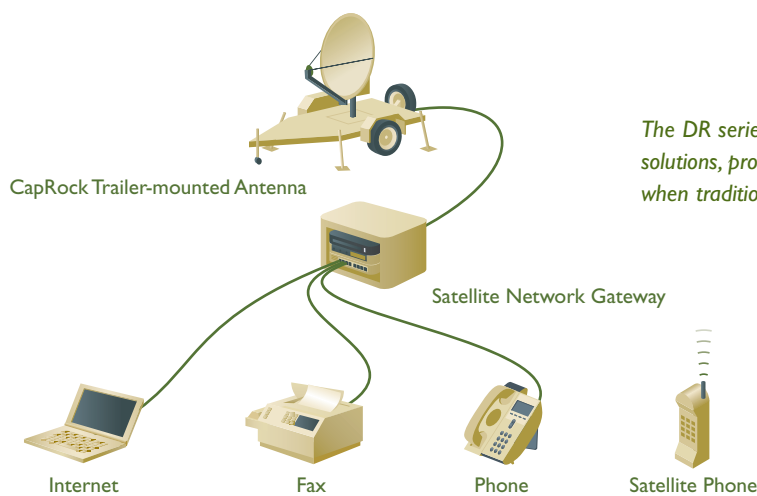

The *Broadband DR-VSAT™* program is designed for recovery personnel who need transportable broadband and multi-line voice services in disaster affected areas.

### PRIVATE LINE DR-VSAT™

The *Private Line DR-VSAT™* program is designed for enterprises that need to temporarily replace high capacity private line terrestrial services, such as T1's and above.

		Duplex Service Rates Includes Voice and Fax	Voice Lines Standard*	Fax Lines Standard*	Term
<b>Broadband DR-VSAT</b>	DR-250	256 Kbps burst rate 128 Kbps committed rate	2	1	Hurricane Season: 8 months Annual Plan: 12 months
